Work Experience

Freelance Web Developer and Technical Consultant Vancouver BC, June 2023 to Present

- Providing setup and CMS support for client websites.
- Provide DNS update support and consultation on registrars and hosting.
- Developing and deploying customizations in HTML5, CSS3 and JavaScript.
- Providing web accessibility consultation of WCAG 2 guidelines.

Software Engineer at MRI Software Toronto ON, February 2022 to March 2023

- Built and deployed websites and applications using Vue and PHP based CMS pulling data from MySQL databases and REST APIs.
- Provided technical subject matter expertise and pre-sales support, contributing to successful new product sales.
- Coordinated a year-long server migration project of 700+ web and database items across 3 servers, managed tasks and timelines, delegated responsibilities and managed expectations with stakeholders.
- Contributed to efficiency improvements by researching and analyzing candidate technologies and platform requirements with a focus on scalability and automation, reducing team's manual workload.

Web Developer at Angus Systems Toronto ON, May 2020 to February 2022

- Developed websites, custom themes, integrations and apps using HTML5, CSS3, JavaScript and PHP, among other technologies.
- Remotely administered 350+ websites for 20+ clients, troubleshooting website and database issues with a high degree of autonomy.
- Responsible for setup, configuration, updates, modifications as well as troubleshooting support and training for clients per business needs.
- Wrote and continuously improved technical documentation for internal team use as well as client reference and training.

Media Services Coordinator at Corus Entertainment Toronto ON, August 2019 to October 2019

- Tracked and documented issues per accountability mechanisms.
- Verified, categorized and migrated 5000+ broadcast media assets while maintaining progress reports and logging issues.
- Conducted QA of upcoming broadcast media content: video footage, audio integrity and closed captioning accuracy.
